

PDCH-G10 Housing

Housing for Canon Power Shot G10 Digital Camera

All techniques of Patima ENG are gathered to this Patima-PDCH G10 housing. It is released through Patima-5050, 5060, 7070, 350D, 400D, D80, G9 digital camera housing.

We did add the fiber-optic cable adaptor so using strobe will be able in two ways(slave and bulkhead synchro).

Sensitive shutter and All levers, dials, buttons are designed to be used easily. And also this housing is designed for convenient use to photograph in any position.

According to the features of Canon POWER SHOT G10 digital camera, there are two types of the ports

exclusive port for wide angle

When the exclusive port for wide angle is applied, 67mm mount UW wide lens is able to be used.

The zoom must be fixed to maximum, so it is not possible to use the zoom. The user can exchange the exclusive port for wide angle and the basic port.

Basic port

It is possible to use the zoom. The user can exchange with the exclusive port for wide angle.

NIKONOS type 5pin bulkhead

This bulkhead is for the NIKONOS type 5pin strobes.

Patima type 6pin bulkhead

This bulkhead is for Canon 580EX, 580EX2 and SunPak flash.

Fiber-optic cable adaptor

Fiber-optic cable adaptor provides comfortable use of a strobe by slave operation.

Neoprene protector included strap provides comfortable use.

Patima-accessory shoe joint(F type)

Patima-accessory shoe joint(S type)

The target light and accessories can be applied, if Patima Accessory Shoe Joint(S, F type) is attached.

Single Tray

Double Tray

It is the exclusive bracket package for Patima-G10 housing. It can be fixed on left or right side freely. It can be fixed to both sides for using double strobes and the target light.

Photo Big-Bear and Photo Mini-Bear are developed for underwater photographing. It provides soft light by the diffused glass.
